Cheap Watts

Free help to cut what your electricity costs. No sign-up.

It answers the questions people ask about their bills

- What does my washing machine, tumble dryer or electric heater cost to run?
- When is the cheapest time to run it on my tariff, and what will it cost then?
- Is the kettle cheaper than the hob? Is a heated airer cheaper than the tumble dryer?
- Would a different tariff save me money, based on my own smart meter data?

One load of washing, dried two ways

Tumble dryer, full load (about 4 units)	**£1.08**
Heated airer, same load (about 1.2 units)	**32p**

At the standard price-capped rate in South East England on 29 October 2026, 26.9p per unit. Prices change; the site shows today's rate where you live.
